

# Dive into the dark web

## Data science and usage patters of Tor:

- What is this great technology called Tor?
- How Tor supports human rights and journalism?
- How cyber criminals use Tor?
- How much Finnish people buy illegal drugs using Tor?

### [Ahmia.fi](#) - Search engine for the Tor Network

Ahmia's mission is to create the premier search engine for services residing on the Tor anonymity network. In doing so, we hope to share meaningful statistics, insights, and news about the Tor network and the Tor project.

Contributors to Ahmia believe that the Tor network is an important and resilient distributed platform for anonymity and privacy worldwide. By providing a search engine for what many call the "deep web" or "dark net", Ahmia makes hidden services accessible to a wide range of people, not just Tor network early adopters.

### About Juha Nurmi, Ahmia Project Leader, Researcher, Hacker, Entrepreneur

**Juha Nurmi** ([juha.nurmi@ahmia.fi](mailto:juha.nurmi@ahmia.fi)) (age 27) is the founder and project leader of the Ahmia search engine project. He is the CEO of data mining and security company Dignify, a security researcher, and has been involved in numerous projects funded by both the commercial and government spheres, including DARPA Memex project in the Silicon Valley. Juha is also a noted lecturer and public speaker. Juha's work on Ahmia has been in part sponsored by the Google Summer of Code.
